WORK EXPERIENCE

Front End Developer

Apr 2022 - Jul 2024

Around | The Broadcast Revolution, Olivos, Provincia de Buenos Aires, Argentina

Discussed, developed, implemented new features, squashed bugs and optimized code in applications using React, React Redux, and JavaScript + JQuery. Used HTML + CSS for templates. Implemented modern styling techniques, including Styled Components, CSS Modules, and Sass CSS. Utilized Cypress for testing, mainly for E2E testing. Maintained version control using Git and GitLab, ensuring efficient collaboration and seamless code integration. As a company, we've followed OKR's framework. As the dev team, we used Kanban board with Agile meetings (retro, daily, weekly) in Jira. It was the outmost important to keep updates in Jira tickets to correctly track development and project status.

Web Ui Engineer

Jun 2021 - Apr 2022

Globant, Capital Federal, Buenos Aires, Argentina

Collaborated with Disney as part of a Globant team to develop and maintain a data normalizer service, utilizing JavaScript, React, Next.js, AgGrid, MaterialUi, and some Node.js. Leveraged agile methodologies to manage project timelines and deliverables. Contributed to some backend development tasks in Node.js. transfer between team members. Collaborated effectively with cross-functional teams (BD + PM, UX/UI, BE dev team).

Web Software Engineer

Aug 2019 - May 2021

Cognizant Softvision, Capital Federal, Buenos Aires, Argentina

Developed and implement code for web applications for multiple projects, including Shell, an HR tracking tool, and Cognizant Softvision's web page, utilizing HTML, CSS, JavaScript, React, Next.js, Gitlab, Jira, and Figma.
